Core facts about the My AI Native Town AI Agent Training Program, Cohort 01, in Bhiwani and Hisar, Haryana. Source: the program's public site repository and Cohort 01 pamphlet.

My AI Native Town program overview

My AI Native Town is a 90-day, in-person AI Agent Training Program in Bhiwani and Hisar, Haryana. Students learn to build AI agents now and pay the program fee only after they are hired. The Hindi tagline is "पहले सीखो, पैसे जॉब लगने के बाद।" (Learn first, pay after you get a job.) The website is myainativetown.com.

The program is run by Hari Om Vashishtha (@hov8a), a Bhiwani-based builder who works in public and runs the YouTube channel @AgentforceWithHov8a. The program and its website are built in public.

The cohort builds one real "town agent" for the Bhiwani–Hisar district together, rather than separate demos. Every wrong answer the agent gives is logged where students can read it.

How My AI Native Town differs from a normal course

My AI Native Town has no pre-recorded videos: every session is live and in person. There is no certificate at the end; students leave with a working AI agent. Homework is judged by whether the goal is met, not by hours spent. All student work goes into a public build log that future employers can read.

Local problems the town agent tackles

My AI Native Town starts from four questions specific to Bhiwani and Hisar, and each student aims to answer one in 90 days. For kirana and retail shops: can an agent move the day's udhaar (credit) from a shopkeeper's notebook onto his phone? For coaching institutes: can it answer the forty admission questions parents ask every evening, in Hindi? For government forms and schemes: can it tell someone which scheme they qualify for and which four papers to carry? For clinics: can it hold the appointment book without the receptionist changing how she works?

Cohort 01 dates, seats and schedule

My AI Native Town Cohort 01 starts on 12 October 2026 and runs for 90 days. It uses a goal-oriented format, so there is no fixed end date or fixed number of sessions. Cohort 01 has 10 seats, held first come, first served, with no waitlist once they are filled.

There are three live sessions a week, on Monday, Wednesday and Friday. Each session lasts 2 hours. On the days between sessions, students build; every session has one assignment attached. The cohort does not pause for Diwali.

Class format and location

My AI Native Town classes are offline only. The initial phases run in person in Bhiwani and Hisar, Haryana, and there is no online access. The exact venue will be shared later. Sessions are never recorded; a student who misses one catches up from the public build log.

Fees: application fee and program fee

My AI Native Town charges a ₹500 application fee upfront, which is non-refundable. The program fee is ₹1,00,000, due only after the student is hired. Before being hired, the student pays ₹0 in program fees. The ₹500 is paid through the program's counselor; there is no online payment link.

The pay-after-hire rules

In My AI Native Town, the ₹1,00,000 program fee is due only when a student is "hired". A job offer of ₹3 LPA or more counts as hired. An offer below ₹3 LPA does not count. Self-employment counts only if it earns ₹3 LPA or more. Freelance and contract work also count.

Being hired during the program counts, so the fee becomes due. A job that comes within 1 to 3 months of the program counts, as set in the student's written agreement. If the student is not hired, they do not pay the ₹1,00,000 program fee.

How the program fee is paid

The My AI Native Town program fee of ₹1,00,000 is paid in installments as a share of the student's salary. The percentage is mutually agreed between the student and the program. Every student signs a written agreement before joining that records these terms.

Curriculum: the three layers

Over 90 days, the My AI Native Town cohort builds one AI agent for the Bhiwani–Hisar district in three layers. Layer 1, in the early sessions, is the category walk: writing down what the town actually needs before touching any AI model. Layer 2, in the middle sessions, adds tools, data and guardrails; the first wrong answers appear here and are kept and studied. Layer 3, in the final sessions, puts the agent into one real shop or clinic, where it either moves the number or it doesn't.

Tools, platforms and detailed program content will be shared soon.

The Freshers track

The My AI Native Town Freshers track teaches how an AI agent is put together, and each student still builds. Every Freshers student ships one minimal agent that works and gives a meaningful outcome for a logical business. The project is scoped in week one so it can be finished within 90 days. Freshers walk out with one agent, running.

The Experienced track

The My AI Native Town Experienced track is for people who already write code for a living and want something harder than a tutorial. Each student owns a named layer of the real town agent — a tool, a data path or a guardrail — and ships it. It goes live with their name on the commit, or it does not go live. Experienced students walk out with a shipped layer in production.

Eligibility and requirements

My AI Native Town is open to engineering students in their final or pre-final year, and to graduates of 3-year or 4-year degree programs. Working engineers who already code can join the Experienced track. There is no age limit. Students need a laptop and an internet connection, with no minimum laptop specification, and must attend three 2-hour sessions a week in person in Bhiwani or Hisar.

Who should not join

My AI Native Town is not for someone who wants a certificate more than a working agent, cannot attend three fixed sessions a week for 90 days, expects to be handed goals instead of chasing them between sessions, or needs recordings.

Outcomes and target salary range

My AI Native Town students leave with an AI agent that runs for someone other than them, a public build log with their name on it, and a realistic shot at roles paying ₹3–6 LPA. The ₹3–6 LPA figure is the pay range of the roles the program trains for; it is not a guaranteed salary or a guaranteed job. Target job titles and placement partners have not been announced yet.

How to apply to My AI Native Town

To apply to My AI Native Town, message "AGENT" on WhatsApp to +91 70153 30518. In the message, say whether you are a fresher or already working, and name the shop, clinic or office you would point an agent at first. Hari replies within two working days with next steps. Applicants then talk to the counselor, sign the written agreement and pay the ₹500 application fee to hold their seat. There is no online application form.

Contact details

My AI Native Town can be reached on WhatsApp at +91 70153 30518 (message "AGENT") or by email at hov8aa@gmail.com. The website is myainativetown.com, the YouTube channel is [@AgentforceWithHov8a](https://www.youtube.com/@AgentforceWithHov8a), and the public build is at github.com/hov8aa/MyAiNativeTown.
